

Ålands Golfklubb in Kastelholm, Åland is excited to announce an exceptional career opportunity of **Golf Course Irrigation Technician**. This is a career opportunity with serious growth potential and the right candidate is expected to become a senior member of the golf course maintenance team from Day 1.

Key Responsibilities

Overall responsible for the maintenance, repairs, installation and operation of golf course irrigation systems (Slottsbanan is Rain Bird IC, Kungsbanan and Prinsessan are Rain Bird decoder). Report to and liaise with the Golf Course Superintendent to discuss, implement and monitor irrigation applications. Responsible for the efficient and effective application of all water resources and irrigation programs within the facility.

The Rain Bird decoder system on the Kungsbanan will be replaced with a new IC system over the next several years and the Irrigation Technician will have an opportunity to lead this project.

Ideal Qualifications

Minimum 2 years of experience in charge of a similar irrigation system with proven knowledge of successful maintenance, installation and operation of a high-end golf course irrigation system or qualified Greenkeeper with minimum 5 years of greenkeeping experience with keen interest and exposure to modern golf course irrigation technology.

In addition:

Experience with trenchers, excavators, multi-meters, wire locators.
Confident in using everyday office software, such as Microsoft 365.

A professional individual with a methodological approach to work, self-motivated, possess strong leadership skills.

Fluency in English is a must for this role, while Swedish will be of great personal benefit.
