

Ålands Golfklubb in Kastelholm, Åland is looking for a **Spray Technician** to join the agronomy team. Spray Technician will work closely with the Golf Course Superintendent, Assistant Superintendent and the Irrigation Technician, and will report directly to the Golf Course Superintendent. This is a full-time career opportunity for a qualified mid-career greenkeeper.

#### **Duties and Responsibilities**

Overall responsible for organising and carrying out of all chemical, herbicide and fertiliser applications at Ålands Golfklubb. Keeps detailed record of all applications as per company guidelines and legislation, and complies with all internal procedures as it pertains to budgetary and inventory control.

Implements safety procedures including proper use of PPE and safe work practices in compliance of national legislation. Calibrates sprayers, spreaders, and applies plant protectant materials. Sustains application and mixing equipment in working order by planning and implementing preventative maintenance. Adheres to a detailed and monitored Integrated Pest Management Program.

Identifies and reports pest and nutrient issues requiring corrective action. Mixes, loads, and applies turf chemicals and fertilisers in accordance with product labelling and legislation. Trains, assigns and supervises crew members in the proper use and handling of all chemicals, fertilisers and related products.

Coordinates with Golf Course Superintendent on special projects, daily work assignments and progress of work and helps the Assistant Superintendents in overseeing the crew as needed. Assists in the coordination and scheduling of pesticide applications, mowing and cultural practices based on volume of play and turf needs.

#### **Ideal Qualifications**

A Qualified Greenkeeper with minimum 5 years of greenkeeping experience. Previous chemical application experience is preferred, but not a requirement.

Candidates with interest in long-term employment with the Club will be strongly considered regardless of prior experience.
